Hey dude,

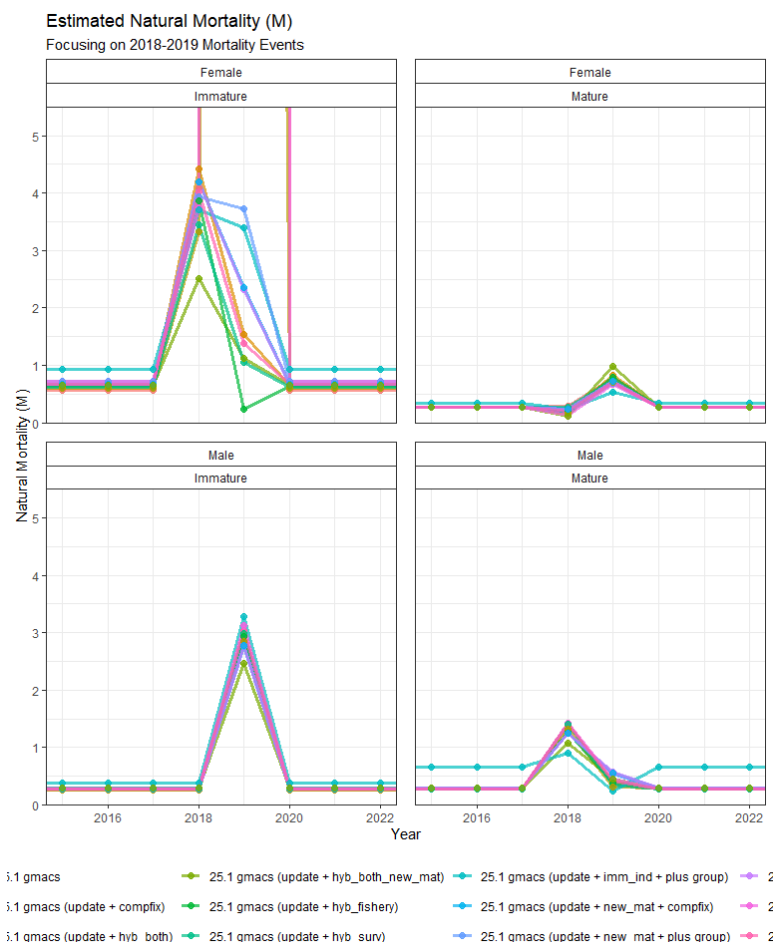

Jitters went (see below). I was surprised to see that the immature index actually fixed it this time...not sure what went wrong the first time. I was either pulling the wrong file or the 0.001 in the last bin of total catch made a difference. Although it gets rid of the bimodality, there are a lot of other knock on effects that would need some explaining (which is often the trickiest part of putting these may documents together--something always blows up in a way I didn't expect).

A much smaller BMSY is one.

Model	BMSY	Bcurr/BMSY	Fmsy	Fofl	OFL
25.1 gmacs	173.31	0.88	32.53	28.18	37.60
25.1 gmacs (update)	181.27	0.89	37.56	32.92	45.48
25.1 gmacs (update + compfix)	177.53	0.90	41.65	37.24	45.88
25.1 gmacs (update + plus group)	183.54	0.87	38.32	32.67	43.75
25.1 gmacs (update + new_mat + plus group)	171.60	0.96	40.79	38.94	50.27
25.1 gmacs (update + imm_ind + plus group)	94.37	0.95	156.16	147.99	36.36
25.1 gmacs (update + hyb_surv)	176.33	0.93	34.46	31.59	47.83
25.1 gmacs (update + hyb_fishery)	169.34	0.91	37.04	33.39	44.16
25.1 gmacs (update + hyb_both)	166.56	0.96	34.93	33.30	42.14
25.1 gmacs (update + new_mat)	171.92	0.97	38.16	36.80	51.40
25.1 gmacs (update + new_mat + compfix)	173.54	0.96	39.48	37.94	51.53
25.1 gmacs (update + hyb_both_new_mat)	160.35	1.02	43.28	43.28	55.74

A much larger mature male natural mortality is another.

I was having problems getting your revised .Rmd to knit, but I did plot some things to look. the immature index model fits are no longer plotted from the immature model (or rather they are overplotted on the mature index), but that's a small fix.

I did not try to adjust the .Rmd file to get it to work on my computer because I did not want to mess up your flow. I also did not push any of my changes to get other things to work (jittering or inclusion of the immature model) because when I went to push there were conflicts and I didn't want to mess your flow up again. The only thing important that I did was make the jittering figure, so I'd just plop it into your \plots directory and call it good. I can change the names when I get back.

Hope your trip was good!

Cody
